The QuAI-i *V-E, is a legal networking format to consolidate “Science and Art Entanglement” as a driving force of procurement and forecasting start-up activities for improving new approaches in business plans.

The QuAI-i *V-E is founded in combination with **EGOCREANET** and **QUANTUM-BIONET** .

→ Aim: QuAI-i *V-E will become an international cooperation-network co-organizing independent partners to collaborate in art & science sharing, to formulating , implementing and evaluating “cross-functional innovation” by means pre-competitive strategic projects or business start-up, utilizing both models of “open” and/or “disruptive” Innovation;

- QuAI-i *V-E refers to the above activities as strategic “Procurement and Forecasting for enhancing the “Future knowledge economy”, by means anticipating insights and foresight scenarios coming from recent studies and ideas of **Egocreanet** and **Quantum Bio-Net**;
- To Partners of QuAI-i *V-E will be requested to subscribing the same aim, goal and economic perspective and using the internet modes to communicate;
- Goal : The QuAI-i *V-E will operating nearly as a business development consultant agency of strategic procurement & forecasting for business innovation activities, and to manage a networking construction of international strategic projects, linking a framework of industries to support their innovation business activities at international level . The above will be made according to the potentiality of the incremental development , exploitation and impact of “Quantum-Art” initiatives and performances and other pilot operation aimed to sharing advanced innovation in different business sectors, as for instance those involving “nano- and bio-technologies” all over the world.

- Business pre-competitive strategy:

The QuAI-i *V-E pre-competitive projects and programs for business trans-national entrepreneurs will be co-organised with partners in the following logic steps in the context of the evolving global market trends :

a) to define by means the QuAI-i *V-E management competencies the market and marketing based requirements to achieve strategic international goals to exploiting innovation of Industry through the two strategies of “open-innovation “and/or of “disruptive -innovation” procedures .

b) Supporting by means the Quantum Art /Egocreanet initiatives and performances and demonstration the previous strategies to implementing in the global market the industrial innovation of process or goods.

-Search for Partners :

QuAI-i * V-E search for partners to aggregate an international cluster of artists and scientists and business innovators, to transform the obsolete mechanical “Science&Culture” by creative strategic planning of knowledge based future society

The goals of the fertilization made by Scientist & Artist & Innovation trans-national cluster will be :

- 1) Enhancing whole-brain creative thinking skills**
- 2) Developing artful “Knowledge Society” leaders and managers**
- 3) Designing strategies for innovation management in “art-science and innovation “**
